Regulatory audit

01

Audit of organizations handling sensitive data to comply with local IT and data privacy regulations or international directives

IT Security audit

02

IT security audit services according to international recommendations based on ACPM expertise or client requirement (including ISO, COBIT, NIST, Common Criteria)

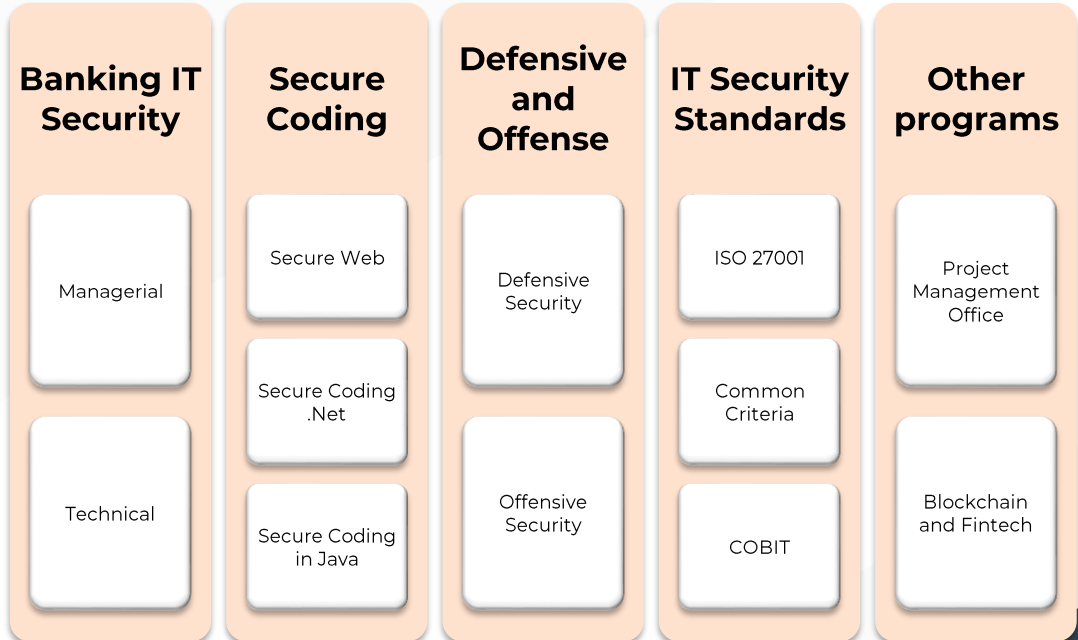

Solution audit and code review

03

Security audit on a solution or product basis, mainly before product launch to identify vulnerabilities before market release

Training services

► ACPM SecureOffice

SecureOffice is a **home-office productivity system** built on open-source tools, implemented and optimized by ACPM.

To support businesses during COVID-19 and beyond with home office work, ACPM SecureOffice offers **file sharing, video conference and screenshare, calendar, internal chat** and more.

SecureOffice can be implemented on client's infrastructure with AD support remotely, within even 2 weeks. Private-cloud implementation also supported.

ACPM SecureOffice revenue model is based on a one-off implementation fee and monthly support fee. We do not charge license fee based on open-source software implementation, making SecureOffice a **cost-efficient, high-performance system**.

► Managed SOC

Security Operation Center designed and built by ACPM security experts: **budget-friendly solution with fast implementation.**

SOC can be implemented as **SOC-as-a-Service** (monthly fee and SOC operated from Hungary) **or on-sight at the client** and offered to other businesses as a service.

Built on open-source tools and solutions designed to be fast to implement and compliant with international regulations. **Scalable with no added costs** or licence fees.

System includes ongoing **security monitoring, security incident response, automated and manual security reports and ticketing system** with expert support.
