

Shri Narendra Modi
Hon'ble Prime Minister of India

“ For the first time in India, a challenge is being floated, in which the citizens of urban India could contribute in the formulation of development visions of their cities. Those cities which are able to competitively meet the required parameters would be developed as smart cities. This competitive mechanism would end the top-down approach and lead to people-centric urban development. ”

Shri M. Venkalah Naidu
Hon'ble Union Minister of Urban Development,
Housing and Urban Poverty Alleviation and
Parliamentary Affairs

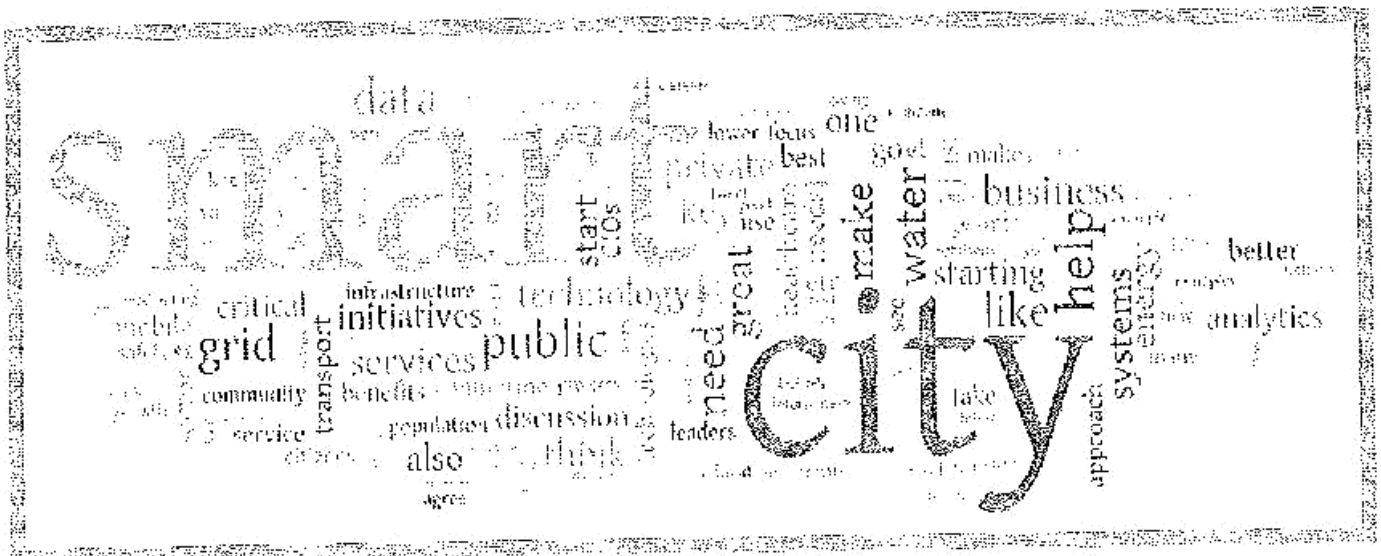

Shri Sunil Kanoria
President, ASSOCHAM

GLOBAL PARTNERSHIP SUMMIT

SMART CITIES: SMART INDIA

February 10, 2016 - Hotel Le-Meridien, New Delhi

The Government of India has announced development of 100 Smart Cities to provide a creative and stimulating environment for SMART CITY development as global role models in urban settlement. With this initiative, the country is all set to become the World Capital of Smart Cities and largest hub of modern city systems. This opens the floodgates to mega opportunities for global giants, in numerous fields. To start the process of realizing the goals of Smart Cities, ASSOCHAM has constituted 'Smart Cities India Forum' to facilitate implementation, partnership and promotion of various Smart City endeavors.

India is urbanizing at an unprecedented rate. Estimates suggest that 600 Mn of Indians will be living in cities by 2030. Smart cities have claimed a central position in the innovation agendas of Governments, research organizations, and technology vendors, posing unique opportunities and challenges in terms of development dimensions, scope and significance.

To carry forward the initiative of the Government of India, ASSOCHAM is organizing Global Partnership Summit: Smart Cities - Smart India at 09.30 a.m. on February 10, 2016, at Hotel Le Meridien, New Delhi. The Summit will serve as a platform for creating partnership in all aspects of a Smart City, such as people-oriented needs, technology, services and e-governance, to act as an incubator centre for Smart Cities, working as a consultative body for dialogues among various stakeholders and to promote Smart Cities as global business hubs, by ensuring all knowledge & policy support to strengthen their development. This will bring together a large number of stakeholders and investors from within and outside India on this platform to share and discuss latest trends as well as success cases, emerging technologies and collaboration opportunities in Smart Cities in India.

FEATURES OF COMPREHENSIVE DEVELOPMENT IN SMART CITIES

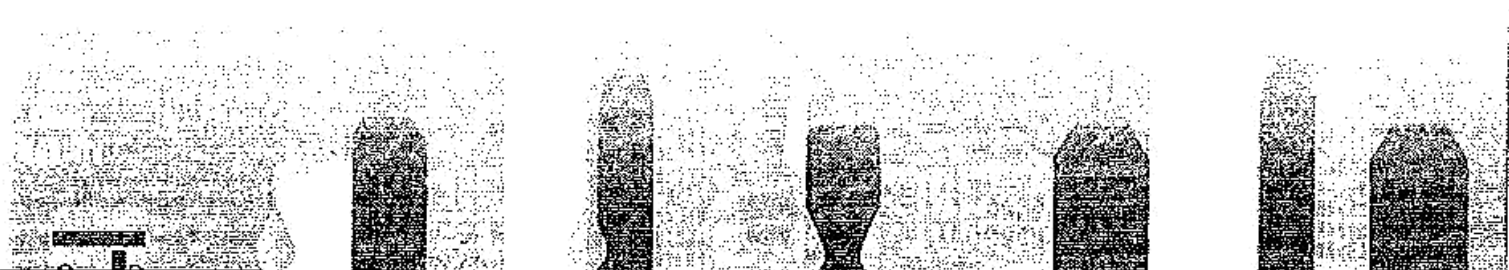

- Promoting mixed land use in area based developments – planning for 'unplanned areas'.
- Housing and inclusiveness - expand housing opportunities for all
- Creating walkable localities.
- Preserving and developing open spaces.
- Promoting a variety of transport options-Transit Oriented Development (TOD), public transport and last mile para-transport connectivity;
- Making governance citizen-friendly and cost effective.
- Applying Smart Solutions to infrastructure and services in area-based development.
- Giving an identity to the city-based on its main economic activity.

OBJECTIVE OF THE SUMMIT

The Summit will bring together the investors, experts, stakeholders and policy makers, State Governments and local authorities at one platform to discuss and start the process of implementation of smart city development. It will bring out a blue print for successful and timely implementation of projects by sharing global best practices, international cooperation and expertise. There will be one-to-one discussions on investment, financing and implementation opportunities. The summit will be the first of its kind of forum in the country to serve as a platform for partnership and ensuring knowledge and policy support to their implementation and development.

INFRASTRUCTURE ELEMENTS AND INVESTMENT OPPORTUNITIES

- | | |
|---|--|
| <ul style="list-style-type: none"> • Efficient urban mobility and public transport • Smart buildings and Affordable housing • Robust IT connectivity and digitalization • e governance and citizen participation • Sustainable environment | <ul style="list-style-type: none"> • Safety and security of citizens • Smart Healthcare, education and e-learning facilities • water supply solutions • Energy and electricity supply solutions • Solid waste management and Sanitation |
|---|--|
