II International Investfunds Forum is a unique event that allows participants to explore the experience of other countries in institutional asset management industry, and meet in an informal setting with colleagues from Russia, the CIS and Eastern Europe. It will gather representatives of major regulators, pension funds, insurance companies, endowment funds, managers, investment companies, banks and law firms.

Last year, the Forum brought together about 100 attendees, who gave very positive feedback about the event, which offered informative presentations, lively discussions, well-balanced composition of participants and a very interesting informal program.

This year main themes of our conference will be:

- Institutional investors of the region in search of new customers, investment ideas and points of growth.
- Best long-term asset management strategies for institutional clients.
- Investor protection regulations. Global trends in the funds market.
- Available instruments of alternative investment. Choosing the best form and content.
